

### **T436 Week 1 "Film look" Scene Fragment exercise (10 points):**

You will shoot a scene that looks as much like film as possible (given the limited shooting conditions). Consider the blocking, framing and camera composition.

In the scene one person will be waiting for another. The second person shows up, and they leave together.

Requirements:

- Shoot in HD 1080i (60i not 24 fps)
- Try to make it look as much like film as possible
- Use no more than 4 shots
- Edit your piece into an HD sequence. Output an HD Apple ProRes Quicktime file. Place a copy (saved as your username) in the T436 dropbox before the start of the week 2 lab. Upload an HD version to Youtube, Vimeo or any other video/blog sharing site.
- Write a critique (for Week 2 lab) that explains what is going on in your scene and that critiques your work. Alternatively, you can upload the critique to your blog. Make sure there is a link to the on-line copy near the top of the page.
