TITLE: "HOW TO: CARVE A PUMPKIN"

OBJECTIVE: The objective of this production is to not only demonstrate the correct and safest techniques of how to carve a pumpkin, but to also show how easy and fun it can be.

TARGET AUDIENCE: The target audience for this tutorial is for the person who wants to be festive, but has no experience in carving a pumpkin.

SHOW DESCRIPTION: Ever wanted to carve a pumpkin into a bonafide jack-o'-lantern? Don't know where to start? Look no further! Tune in and learn how to create one of the most iconic Halloween symbols with your host, [INSERT HOST]. Learn everything there is to know, from how to pick the perfect pumpkin, to the must have carving utensils.

PRODUCTION PLAN: For this tutorial, I will need to create a title graphic, a lower third, and visual aids for the demonstration, such as safety warnings. I will need all four cameras in Studio 5. I will need music clips for the intro and outro. As for the crew, I will need 4 camera ops, a floor director, a lighting tech, two audio engineers, graphics, TD, AD, teleprompter, and director.

PROPS AND WARDROBE: The host will wear a black turtle neck. Two pumpkins will be needed, one to carve, and one as a backup as well as a candle to put inside. Tools to carve the pumpkin will also be needed. A table, with a black tablecloth, will be needed to do the demonstration on. The front of the table will be decorated with fake cob webs.

MUSIC UNDER HOST

HOST:

They scooped out my brains
And turned it into a pie
I'm a little spooky
Who am I?

A jack-o'-lantern!

Hi, welcome to Out of Your Gourd, a show where I'll teach you the ins and outs of the century old tradition of carving a pumpkin.
